ML13 IRAN/NUCLEAR MACNEIL: An authoritative British publication that BOMB reports on weapons said today that Iran is in the final stages of making a nuclear bomb. The publication, Jane's Defense Weekly, said that the bomb is likely to be ready for use within two years, when West German experts finish building a nuclear power plant in southern Iran. However, United Press International quoted a knowledgeable source as casting doubt on that timetable. This source said it would take several years to complete the power plant and several more years to build the bomb.
